

PREMIUM SILICONE SEALANTS

HI-PERFORMANCE

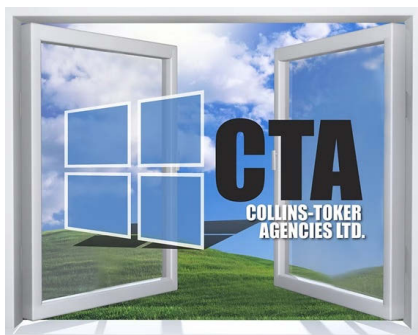

Premier XtraBond® Silicone Sealants are powerful, flexible sealants that can be used across a wide variety of residential, construction, industrial and transportation applications. They offer significant adhesion, movement capability and durability as compared to other families of sealants. Each XtraBond® Silicone Sealant is uniquely designed to exhibit curing characteristics to match your specialized application needs. From a silicone sealant that is room temperature vulcanizing to one that can withstand high temperature environments, Premier has engineered a silicone sealant primed to conquer the requirements of your unique adhesion needs.

XtraBond®450 Neutral Cure Silicone Sealant

XtraBond®450 is a one component, non-sag, permanently flexible neutral cure silicone sealant. The product is engineered to deliver excellent adhesion to vinyl, glass, aluminum, wood, sheet metal and most common building materials – without the need of a primer.

- Superior adhesion to Kynar™ coated metals
- Excellent adhesion to glass
- Window & door approved
- Excellent UV resistance
- Non-paintable
