

Stocked and Supported by Collins-Toker Ltd.

XtraFlash™ Membrane is an aggressive self-adhered waterproof flashing membrane engineered for windows, doors and building openings.

Its advanced butyl/rubberized asphalt compound provides superior adhesion and self-seals around fasteners for long-lasting weather protection.

KEY BENEFITS

SELF-SEALING AROUND FASTENERS
Seals around nails and other fasteners to help prevent leaks.

UV RESISTANT
UV resistant up to 180 days.

FAST & FLEXIBLE INSTALLATION
Aggressive self-adhered backing for quick and easy installation.

WILL NOT DELAMINATE OR SHRINK
Engineered for long-term performance and durability.

ADHERES TO A WIDE RANGE OF SURFACES
Bonds to plywood, OSB, masonry, aluminum, vinyl, steel, foam, drywall and housewraps.

INSTALLS IN COLD WEATHER
Can be installed at temperatures as low as 25°F.

IDEAL APPLICATIONS

- ✓ Perimeter sealing of windows & doors
- ✓ Pot shelves & recessed windows
- ✓ Joints & vents
- ✓ Virtually any openings
- ✓ Other exterior penetrations
